WxBrief Copilot – Support

Overview

WxBrief Copilot is an independent aviation weather information application designed to organize publicly available aviation weather data into structured summaries for situational awareness.

WxBrief Copilot is **not affiliated with, endorsed by, sponsored by, or representing the Federal Aviation Administration (FAA), NOAA, the National Weather Service (NWS), or any government agency.**

The app aggregates and reformats publicly distributed aviation weather data for user convenience and readability.

Data Sources

WxBrief Copilot retrieves aviation weather data from publicly available government weather distribution systems.

WxBrief Copilot does not create, modify, or issue original meteorological forecasts.

Weather data displayed may include:

- Surface weather observations
- Terminal forecasts
- Pilot reports
- Advisory products
- Winds aloft forecasts

All data is subject to upstream system availability, transmission latency, and update intervals.

Important Limitations

WxBrief Copilot:

- Is an informational tool only
- Does not provide official weather briefings

- Does not provide air traffic control services
- Does not issue regulatory advisories
- Does not guarantee completeness, accuracy, or timeliness
- Does not replace required preflight planning responsibilities

Users are solely responsible for:

- Verifying weather information through appropriate official sources
- Complying with all applicable aviation regulations
- Exercising independent judgment for flight safety decisions

Weather conditions can change rapidly and may differ from displayed information.

No Government Representation

WxBrief Copilot is a privately developed application.

References to aviation weather formats or briefing structures describe commonly used industry formats and do not imply government authorization, partnership, or certification.

Technical Support

If weather data is not loading:

• Confirm active internet connection
• Verify airport identifier format (e.g., ICAO code)
• Restart the application

Data availability may depend on upstream weather system status.

Contact Support

For technical support inquiries:

Email: wxbrief@zarmada.com
Response time: 1–2 business days

Please include:

• Device model
• iOS version
• App version
• Description of the issue

Disclaimer

WxBrief Copilot is provided “as is” without warranties of any kind, express or implied.

The developer assumes no liability for:

- Flight planning outcomes
- Operational decisions
- Weather-related incidents
- Data inaccuracies or omissions

Use of this application constitutes acceptance of these terms.
